
NASA POWER API
monthly GHI, cloud amount and RH
Download 2005–2025 into a new file
the original 2005–2024 file is kept unchanged
Validate
the same checks as data pre-processing
All checks pass?
No
Wait and retry
until NASA has published 2025
Yes
Check year (2025)
Retrain on 2005–2024 → forecast 2025 → compare with observations;
its errors are added to the weighting history
Final forecast (2026)
Retrain on 2005–2025 → forecast January–December 2026 for every grid cell
Combine the components
time-varying weights from all past errors (2014–2025)
Summarise
monthly values · annual mean and annual total · difference from the
2005–2025 average · uncertainty ranges from past errors
2026 forecast
tables (monthly, annual) and maps
