
Forecasts and metrics
per grid cell: final test, significance tests and the 2026 forecast
Grid polygons and boundary
93 grid cells · Philippine outline
Join the values to the 93 grid cells
matched by grid number (for the maps)
Choose one colour scale per figure
blue = error · blue–red = difference · orange = GHI
R² graph
Forecast vs observed GHI (final test), with the 1:1 line (no map)
RMSE maps
Pooled RMSE per grid cell (final test), six models
Difference maps
Proposed minus each benchmark (2015–2024), significant cells marked
2026 forecast maps
Annual map (two units) and 12 monthly maps
Figures
PNG (300 dpi), SVG and PDF
